

Tricia's Trusty Tonic

A Vapor-Degreasing Solvent Free of Volatile Organic Chemicals

Technical Data Sheet

Introducing TTT!

Tricia's Trusty Tonic is a solvent blend that is non-flammable, non-toxic, contains no ozone depleting chemicals, and meets the zero-volatile organic chemical emission requirements set by the US EPA. Tricia's Trusty Tonic is formulated as an azeotrope so it will maintain a constant composition and performance when used in vapor degreaser equipment. Tricia's Trusty Tonic can be used as a spray and wipe solvent or an ultrasonic dip solvent for spot-free equipment due to its fast-evaporating ability. It is also a much safer choice of solvent compared to NPB and TCE because of its high allowable exposure limit.

Storage Info

Store in areas with temperature between -40° and +120°F. Keep away from direct sunlight and heat sources.

Disposal

Follow local, state, and federal regulations regarding disposal. Contact us for more information.

LssChemical Tricia's Trusty Tonic

Application	Light Duty Degreasing & Defluxing
Method of Use	Vapor Degreasing Equipment
Plastics Compatibility (Acrylic, PC)	Excellent

Physical Properties

Property	Tricia's Trusty Tonic
Application	clear, colorless liquid
Density (g/ml)	1.39
Viscosity at 25°C (cPs)	0.40
Boiling Point (°C)	44
Ozone Depletion	None
Volatile Organic Compounds	0%
Flash Point	None
Est. Solubility of Water @ 25°C (ppm)	<50
Allowable Exposure Limit (ppm)	750
